EDUCATION

B.S.
Engineering

San Francisco State University

September 2014 - June 2018
San Francisco, CA
GPA: 3.8

SKILLS

- JavaScript / React
- Java
- Python
- REST API Integration
- Cross-Functional Collaboration
- Analytical Problem Solving
- Agile Development Practices
- Technical Documentation

CERTIFICATIONS

- AWS CCP

WORK EXPERIENCE

Software Engineer III, Front-End

Philo

December 2020 - current | San Francisco, CA

- Developed advanced frontend components supporting live TV browsing and playback interfaces, enabling rendering of 160+ channel and program listings in real time.
- Optimized client-side rendering performance in React, ***reducing average page load time by 35%*** during peak viewing hours.
- Implemented reusable UI component libraries across 8 streaming interface modules, improving design consistency and maintainability.
- Collaborated with product managers and backend engineers to deliver interface enhancements on a two-week sprint cadence.

Junior Software Developer

LegalZoom

November 2019 - December 2020 | San Mateo, CA

- Developed backend features supporting document automation workflows, enabling generation of 120+ legal document requests daily across customer accounts.
- Refactored processing logic in Java, shortening document generation time by 19 minutes per batch cycle for internal workflows.
- Integrated RESTful APIs connecting 3 legal service modules used for document validation and customer data retrieval.
- Partnered with QA and product teams to deliver application improvements that ***increased internal usability scores to 4.5 / 5*** during release reviews.

Entry-Level Software Engineer

Uber

June 2018 - November 2019 | San Francisco, CA

- Built internal tools supporting ride demand analytics, enabling monitoring of 130+ ride activity metrics within operational dashboards.
- Automated data preparation scripts in Python, ***reducing manual reporting workload by ~5 hours weekly*** for operations analysts.
- Investigated inconsistencies in ride data ingestion pipelines, resolving issues affecting three regional service feeds.
- Documented development workflows and deployment guidelines that shortened onboarding time for new engineers by one training cycle.
