

JOB DESCRIPTION

Position title : Software Developer

Department : Information Technology Services Department

Reporting to : Director of Information Technology Services Department

Job Purpose:

Software Developer is responsible for the development/creation, design, deployment, and implementation of new or modified software products (web-based applications and mobile-based applications) at Muscat College.

The software developer involved drives the overall software development lifecycle, including writing code, working across functional teams, and conducting software testing and maintenance.

Main Duties and Responsibilities:

- Develop, test, and implement new software systems in the College.
- Design and update software database. This includes, but is not limited to: Software Applications, Web Sites, Data Communication Processes, and User Interfaces.
- Test, maintain, and recommend software improvements to ensure strong functionality and optimization.
- Analyze user requirements and convert requirements to design documents.
- Implementing security protocols and procedures to prevent potential threats.
- Performing diagnostic tests and debugging procedures to optimize computer systems.
- Manage data backup and retrieval processes.
- Clearly and regularly communicate with management and technical support colleagues.
- Multi-task and change from one task to another without loss of efficiency.
- Any other tasks assigned by the HOD.
